

# Numbots

'Numbots' is an add-on website to Times Tables Rock Stars and is aimed at developing fluency in mathematics skills (basic addition and subtraction). All children can access this website using their TT Rockstars log in.

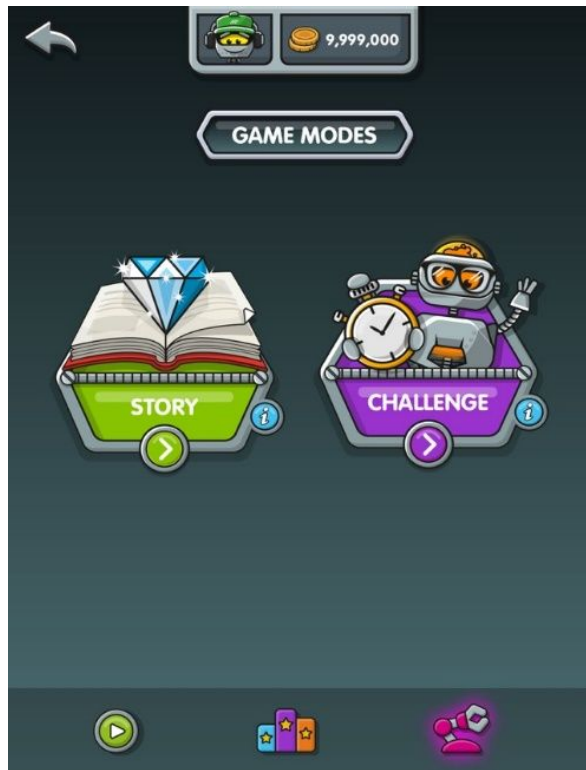

When you go to log in, select the schools button then enter Dereham. After this your child can enter their username and password (same as TT Rockstars).

Your child will then get the option to choose a robot in order to play the games.

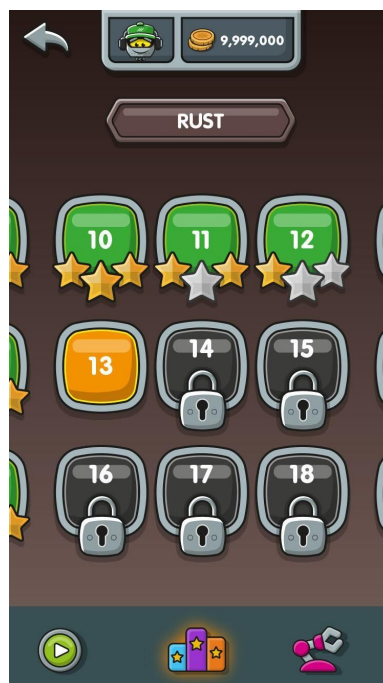

There are two different modes – Story Mode and Challenge Mode.

## Story Mode

In Story Mode there are 18 different stages to work through starting with 'Rust' and ending with 'Diamond'.

In each of these stages will be several levels where your child can earn stars and coins for completing them. The more accurate and faster their answers, the more stars and coins they will get. They will need to earn 2 or more stars to progress to the next level.

## Challenge Mode

Challenge Mode is a quickfire testing round, where pupils can test their skill set and earn trophies and coins.
