

# YEAR FIVE

## The Planetarium comes to Dereham Church of England Junior Academy!

Last Tuesday, Year 5 were lucky enough to 'kick off' our new topic with a visit to a planetarium—inside our very school!

Each class was able to spend some time inside the planetarium, looking at projections of our solar system!

It was fascinating stuff and all the children left the planetarium feeling incredibly excited about the topic ahead of them!

## What have Year 5 been learning so far this half term?

Over the last two weeks, we have been very busy! As already mentioned, we kick started our topic with a visit from the Planetarium which was incredible!

After this, we have started planning and writing our own information leaflets about the planet Pandora. These leaflets need to inform others about this planet but also try to persuade them to visit there!

In Maths, we have been looking at what units of measure might be used to measure what items and how convert between different units eg. Converting kg into g and mm into cm!

### Week 3 Highlight!

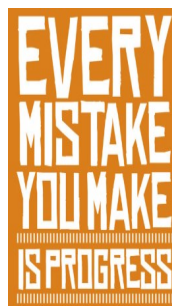

In an amazing lesson this week, each year 5 class looked at phases of the moon using a special tool—Oreos! We used them to show each of the different phases of the moon. It was a very fun lesson!

### Growth Mindset

In school, we are celebrating our mistakes, after all, they help us learn!

Can you find out about any amazing inventions or discoveries that came from mistakes?!
