

Year 5

Topic...

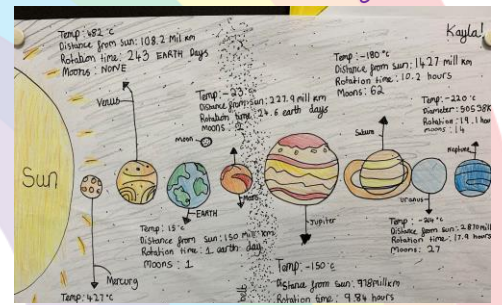

Our topic this half term is **Space!** We have loved learning about space and we are so impressed by the children's enthusiasm for the topic.

So far we have learnt about the planets and their orbits and gravity and air resistance. The children have written some wonderful biographies on the life of Isaac Newton! Next week we will begin to investigate the effect of gravity and air resistance has on a falling object.

Maths...

The last two weeks we have been exploring numbers, their properties and different types of numbers. We learnt what squared and cubed numbers are and how to identify them. We have also been learning how to multiply and divide by 10, 100 and 1000.

Planets in our Solar System...

English...

We have been writing some superb Non-Chronological reports all about Mars. The children have learnt how to organise their information and share their knowledge using a range of multi clause sentences.

Reminder...

Please remember to send your child to school with a full and fresh water bottle each day. Learning is thirsty work!

Some great examples of homework! Well done!
