

# YEAR FOUR

We have had a super couple of weeks learning all about electricity and applying our learning to the design and creation of night-lights. The children have responded brilliantly to the iterative design process of design and making — evaluating and improving their original ideas and showing great ‘growth mindset’ as they work to overcome challenges of failing circuits and design ideas that need tweaking!

Take a look at the school website for more photos from across all classes.

Last week, the children took part in the Multiplication Test Check. We have been very proud of the way they have approached learning of their tables through TTRockstars and other strategies.

Our last topic of the year ‘You are what you Eat’ is all about Food and Digestion. The children will be learning all about the Digestive System, finding out about their teeth and creating different fillings for sandwiches, rolls etc. for a final picnic at the end of the term.

In English, we will be writing letters of complaint about a dreadful restaurant experience!

**On 12th July, we will be having class sports days.**

**Sadly we can’t invite parents and families to attend this year, but children will need to come to school dressed in P.E. kit, with sun lotion, hat and plenty of water. They will also need a packed lunch.**
