

YEAR FOUR

This week...

We have visited **Scarning Water**

Meadow to learn to draw maps and to conduct fieldwork looking at the wildlife and habitats that are there.

We think that Scarning Water Meadow has a rich variety of habitats including long grass, a river and shaded areas. We didn't see many vertebrates except for birds but we did spy a lot of invertebrates.

Last week...

Congratulations to the children who took their level 1 Bikeability test on Friday. You all did a fantastic training session and we hope that you continue to enjoy riding your bikes and becoming more confident cyclists.

Next week...

Is Horstead week!!

For those of us who are going, it will be very exciting and we know that the children will have a wonderful time doing all their activities.

Please do make sure that everything is named!

For those children who are not going, be assured that there are some super activities planned for you!

We would really appreciate if for the next 6 weeks you could ensure that your child is completing their TTRockstar homework. We have the National Times Table Test (MTC) at the start of June that every child has to complete. More importantly however is that knowing your tables is one of the most important maths skills for adult life.
