

YEAR SIX

Science: Blood, Sweat and Tears.

In our science lessons, we have been learning about the human circulatory system and how it works. So far, we have focused on the heart and how it pumps blood (containing nutrients, water and oxygen) to where they are needed in the body. We have also created our own 3D posters using paper straws to explain how the system works! Working scientifically, Year 6 explored how exercise affects our heart rate, planning and conducting investigations to test theories.

Benin Gone!

Over the past week, Year 6 have immersed themselves into the ancient kingdom of Benin. They have been finding out about the rise of this incredible civilisation and what contributed to their decline. Over a series of lessons, they have researched, recorded and written diary entries in role to answer the enquiry: 'What Caused the Rise and Fall of the Benin Kingdom?' Here 's an example of their impressive work.

Feeling Hot Hot Hot!

As the weather has become much warmer, please make sure children are attending school wearing: sun cream; with a sun hat and they have a water bottle.

Some Key Dates:

- 30th—3rd—Residential.
- 11th July—Production (Northgate)
- 16th July - Leavers' Assembly AM (10.15am start)
- 16th July - Year Six 'Summer Vibes' party PM
- 17th—19th July - Transition Days

Residential

The count down is on for the residential! Please make sure your children are at the school for **1:30, this Sunday** (30th of June). Those children not going on the residential also have a jam packed week full of fun arts and crafts; sports; cooking and more! Whilst the rest of Year 6 are away, please send your children in their **PE Kit** and please bring an apron along for the cooking.
